

SPEctronet Sponsorship Form

2011

What is SPEctronet?

SPEctronet (<http://www.specarolinas.org> & <http://www.specarolinas.org>) are the official websites for the Society of Plastics Engineers #49. The Carolinas Section includes over 400 members from Western North Carolina and South Carolina. Although our activities and meetings typically involve members from this area, the website affords us much broader exposure to all Plastics-Industry related individuals with internet access.

Why do people visit SPEctronet?

The website is a portal for all SPE related activities and announcements, as well as archives from the past. The site includes information for upcoming technical programs, company tours, golf outings, Mini-technical conferences, and TOPCON's as well as industry job postings, annual essay contests, student scholarships programs, upcoming Plasti-Van locations, and monthly board meeting and international council reports. The site also includes archives of past programs with event summaries and pictures, consultant's corner articles and International SPE links.

Why Sponsor SPEctronet?

The website contains your company logo on the main page at all times, no matter which page you are viewing. Your logo is a hot link to your company website which should provide more exposure for your company and its products and services. The sponsorship fee is a donation to our chapter which is used to fund our various educational programs such as the "Wonder of Plastics" essay contest for high school students, the Goolsby Scholarship for College Students, and the Plasti-van which we employ at various elementary, junior, and senior high schools around the area to educate students about Plastics. The website averages over 3,000 visitors per month.
